ANNEX — CALCULATION RECORD (5% IN NON-HAZARDOUS BASE)

Method: upper limit of each range in the supplier's SDS $\times 0.05$; for d-limonene (8.933%) and amyl cinnamal (0.459%) the actual contents from the allergen certificate (17/03/2026) were used. Inert base = 0% contribution. Conservative method: applied to the pure fragrance it would give a more severe aquatic result than the supplier's classification (Aquatic Chronic 3), which uses exact contents.
