SECTION 16: Other information

Revision	Version 1.0 — Eco Candle Project edition, 21/10/2026. Based on the manufacturer's SDS for the pure fragrance (version 1.0 of 15/10/2024, issued 15/10/2024), allergen declaration and IFRA 51st Amendment certificate (15/10/2024). The manufacturer declares component concentrations as ranges; the classification was calculated using the upper limit of each range, which coincides with the exact values given in the manufacturer's IFRA certificate and allergen declaration (e.g. benzyl benzoate 35.07%, OTNE 9.35%). The calculation reproduces the manufacturer's classification of the pure fragrance (H302, H315, H317, H319, H400, H411); the manufacturer's label element H410 is not supported by its own classification (Aquatic Chronic 2) and is not used. The 5% and 10% preparations are consistent with the manufacturer's SDSs for those dilutions (H412). Because the IFRA Category 10A limit is 5.41%, the diffuser preparation was calculated at 5% in Augeo Clean Multi instead of 25%.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; OTNE = tetramethyl acetyloctahydronaphthalenes; AHTN = 7-acetyl-1,1,3,4,4,6-hexamethyltetralin; SVHC = Substance of Very High Concern.
