SECTION 16: Other information

Revision	Version 1.0 — Eco Candle Project edition, 21/10/2026. Based on the manufacturer's SDS for the pure fragrance (revision of 23/03/2023, issued 23/03/2023), allergen declaration and IFRA 51st Amendment certificate (01/05/2024). The manufacturer declares component concentrations as ranges; the classification was calculated conservatively using the upper limit of each range (for benzyl benzoate this coincides with the exact value of the manufacturer's allergen declaration and IFRA certificate), which reproduces the manufacturer's classification of the pure fragrance (H315, H317, H411). The 5%, 10% and 25% preparations are consistent with the manufacturer's SDSs for those dilutions (not classified — EUH208; H412; H412). The IFRA Category 10A limit (12.23%) does not allow a 25% reed-diffuser preparation; the diffuser SDS is therefore issued for 12% in Augeo Clean Multi.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; SVHC = Substance of Very High Concern.
