

## SAFETY DATA SHEET

FRENCH CROISSANT — fragrance compound, 100%  
According to Regulation (EC) No 1907/2006 (REACH), Annex II, as amended by Regulation (EU) 2020/878

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1 Product identifier

|                 |                      |
|-----------------|----------------------|
| Product form    | Mixture              |
| Trade name      | FRENCH CROISSANT     |
| UFI             | M3QW-14G3-M00U-YX6D  |
| Type of product | Perfumes, fragrances |

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

|                      |                                                                                                                                           |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Identified uses      | Fragrance compound for the manufacture of candles, wax melts, diffusers and air-care products. For professional use.                      |
| Uses advised against | Not for personal use. Not for direct application to skin. Cosmetic use only within the IFRA limits and with a cosmetic safety assessment. |

#### 1.3 Details of the supplier of the safety data sheet

|         |                                                              |
|---------|--------------------------------------------------------------|
| Company | VEGTEAM, Lda. — Eco Candle Project                           |
| Address | R. Quinta de Santa Marta, Lojas EF, 1495-171 Algés, Portugal |
| E-mail  | info@ecocandleproject.com                                    |
| Website | www.ecocandleproject.com                                     |

#### 1.4 Emergency telephone number

|                  |                                                                  |
|------------------|------------------------------------------------------------------|
| Emergency number | CIAV — Poison Information Centre (INEM): +351 800 250 250 (24 h) |
|------------------|------------------------------------------------------------------|

### SECTION 2: Hazards identification

#### 2.1 Classification of the substance or mixture

|                         |                          |
|-------------------------|--------------------------|
| Acute toxicity (oral)   | Acute Tox. 4 — H302      |
| Eye irritation          | Eye Irrit. 2 — H319      |
| Skin sensitisation      | Skin Sens. 1 — H317      |
| Aquatic hazard, acute   | Aquatic Acute 1 — H400   |
| Aquatic hazard, chronic | Aquatic Chronic 2 — H411 |

Classification calculated by Eco Candle Project with the CLP calculation method (Regulation (EC) No 1272/2008), using the upper limit of each concentration range declared by the manufacturer. In addition to the manufacturer's classification (H302, H317, H319, H411), Aquatic Acute 1 — H400 is applied because benzyl benzoate (Aquatic Acute 1) is present above 25%.

#### 2.2 Label elements

GHS07

GHS09

|                               |                                                           |
|-------------------------------|-----------------------------------------------------------|
| Hazard pictograms             | GHS07, GHS09                                              |
| Signal word                   | WARNING                                                   |
| Contains (hazard-determining) | d-Limonene, Benzyl benzoate, Benzyl alcohol, Ethyl maltol |

|                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|---------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Hazard statements</b>        | H302 Harmful if swallowed.<br>H317 May cause an allergic skin reaction.<br>H319 Causes serious eye irritation.<br>H400 Very toxic to aquatic life.<br>H411 Toxic to aquatic life with long lasting effects.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Supplemental information</b> | EUH208 Contains Acetyl propionyl (2,3-pentanedione). May produce an allergic reaction.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Precautionary statements</b> | P261 Avoid breathing mist/vapours/spray.<br>P273 Avoid release to the environment.<br>P280 Wear protective gloves/eye protection/face protection.<br>P301+P312 IF SWALLOWED: Call a POISON CENTER/doctor if you feel unwell.<br>P302+P352 IF ON SKIN: Wash with plenty of water.<br>P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.<br>P333+P313 If skin irritation or rash occurs: Get medical advice/attention.<br>P337+P313 If eye irritation persists: Get medical advice/attention.<br>P391 Collect spillage.<br>P501 Dispose of contents/container in accordance with local regulations. |
| <b>Finished product</b>         | Candles: also apply the safety labelling of EN 15494. When supplied to consumers add P101/P102 and the name, address and telephone of the supplier.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

### 2.3 Other hazards

The mixture contains no Substances of Very High Concern (SVHC)  $\geq 0.1\%$ , no PBT/vPvB substances (REACH Annex XIII) and no substances with endocrine-disrupting properties  $\geq 0.1\%$  (Delegated Regulation (EU) 2017/2100 / Regulation (EU) 2018/605).

## SECTION 3: Composition/information on ingredients

### 3.2 Mixtures

Mixture of fragrance substances. Hazardous components (and substances with a workplace exposure limit) as declared by the manufacturer:

| Name                                   | Identifiers                                             | %                | Classification (EC) No 1272/2008                                                                                                |

Full text of H-statements: see Section 16.

**SECTION 4: First aid measures**

|                                |                                                                                                                                                                  |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Eye contact</b>             | Rinse cautiously with water for at least 15 minutes, holding eyelids open. Remove contact lenses if easy to do. If eye irritation persists, seek medical advice. |
| <b>Skin contact</b>            | Remove contaminated clothing. Wash skin with plenty of soap and water. If skin irritation or rash occurs, seek medical advice.                                   |
| <b>Inhalation</b>              | Move the person to fresh air and keep at rest. If symptoms persist, seek medical advice.                                                                         |
| <b>Ingestion</b>               | Rinse mouth. Do NOT induce vomiting. Contact the Poison Centre (CIAV 800 250 250) or a doctor.                                                                   |
| <b>Most important symptoms</b> | Eye irritation. May cause an allergic skin reaction.                                                                                                             |
| <b>Medical attention</b>       | Treat symptomatically.                                                                                                                                           |

**SECTION 5: Firefighting measures**

|                                       |                                                                                                              |
|---------------------------------------|--------------------------------------------------------------------------------------------------------------|
| <b>Suitable extinguishing media</b>   | Foam, dry chemical powder, carbon dioxide (CO <sub>2</sub> ).                                                |
| <b>Unsuitable extinguishing media</b> | Water jet.                                                                                                   |
| <b>Special hazards</b>                | Combustion may release smoke, CO and CO <sub>2</sub> . Prevent run-off from entering drains or watercourses. |
| <b>Advice for firefighters</b>        | Self-contained breathing apparatus and full protective clothing.                                             |

**SECTION 6: Accidental release measures**

|                                    |                                                                                                                      |
|------------------------------------|----------------------------------------------------------------------------------------------------------------------|
| <b>Personal precautions</b>        | Wear gloves and eye protection. Ensure ventilation. Remove ignition sources.                                         |
| <b>Environmental precautions</b>   | Prevent entry into drains, watercourses or soil.                                                                     |
| <b>Containment and cleaning up</b> | Absorb with inert material (sand, diatomaceous earth, universal binder) and place in closed containers for disposal. |

**SECTION 7: Handling and storage**

|                              |                                                                                                                                                                                           |
|------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>7.1 Safe handling</b>     | Avoid contact with skin and eyes; do not breathe vapours. Keep away from heat, ignition sources and naked flames. Do not eat, drink or smoke in the work area. Wash hands after handling. |
| <b>7.2 Storage</b>           | Keep container tightly closed in a cool, dry, well-ventilated place (10–25 °C), protected from light, heat and ignition sources. Keep out of reach of children.                           |
| <b>7.3 Specific end uses</b> | See Section 1.2 and the IFRA certificate.                                                                                                                                                 |

**SECTION 8: Exposure controls/personal protection**

|                               |                                                                                                                                                                                                                          |
|-------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>8.1 Control parameters</b> | Exposure limits listed by the manufacturer: d-Limonene, CAS 5989-27-5 — Germany (TRGS 900) AGW 28 mg/m <sup>3</sup> / 5 ppm; Finland HTP 140 mg/m <sup>3</sup> / 25 ppm (8 h). DNEL/PNEC: not available for the mixture. |
| <b>Engineering controls</b>   | Adequate general ventilation; local exhaust for heated or large-scale operations. Eyewash available.                                                                                                                     |
| <b>Eye/face protection</b>    | Safety glasses with side shields or goggles (EN 166).                                                                                                                                                                    |
| <b>Hand protection</b>        | Chemical-resistant nitrile gloves (EN ISO 374), ≥ 0.2 mm.                                                                                                                                                                |
| <b>Respiratory protection</b> | Not required with adequate ventilation; otherwise filter type A (EN 14387).                                                                                                                                              |

**SECTION 9: Physical and chemical properties**

|                       |                       |
|-----------------------|-----------------------|
| <b>Physical state</b> | Liquid                |
| <b>Colour</b>         | Light yellow to amber |

|                            |                                                                                                                |
|----------------------------|----------------------------------------------------------------------------------------------------------------|
| <b>Odour</b>               | Characteristic — gourmand (buttery pastry, vanilla)                                                            |
| <b>Flash point</b>         | 92 °C                                                                                                          |
| <b>Flammability</b>        | Not classified (flash point > 60 °C)                                                                           |
| <b>pH</b>                  | Not applicable                                                                                                 |
| <b>Solubility in water</b> | Practically insoluble                                                                                          |
| <b>Other properties</b>    | Melting/boiling point, density, vapour pressure, viscosity, auto-ignition: not determined by the manufacturer. |

## SECTION 10: Stability and reactivity

|                                |                                                                                  |
|--------------------------------|----------------------------------------------------------------------------------|
| <b>Reactivity / stability</b>  | Stable under normal conditions of use and storage. No dangerous reactions known. |
| <b>Conditions to avoid</b>     | Heat, flames, ignition sources.                                                  |
| <b>Incompatible materials</b>  | Strong oxidising agents.                                                         |
| <b>Hazardous decomposition</b> | In case of combustion: CO, CO <sub>2</sub> and smoke.                            |

## SECTION 11: Toxicological information

|                                                                   |                                  |
|-------------------------------------------------------------------|----------------------------------|
| <b>Acute toxicity (oral)</b>                                      | Not classified (ATE ≈ 615 mg/kg) |
| <b>Skin corrosion/irritation</b>                                  | Not classified                   |
| <b>Eye irritation</b>                                             | Eye Irrit. 2 — H319              |
| <b>Skin sensitisation</b>                                         | Skin Sens. 1 — H317              |
| <b>Aspiration hazard</b>                                          | Not classified                   |
| <b>Mutagenicity, carcinogenicity, reproductive toxicity, STOT</b> | Not classified                   |

## SECTION 12: Ecological information

|                      |                                                                                                                               |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>12.1 Toxicity</b> | Aquatic Acute 1 — H400; Aquatic Chronic 2 — H411. Main contributors: benzyl benzoate and d-Limonene.                          |
| <b>12.2-12.7</b>     | No data for the mixture. No PBT/vPvB or endocrine-disrupting substances ≥ 0.1%. Do not allow to enter drains or watercourses. |

## SECTION 13: Disposal considerations

|                                     |                                                                                                                   |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| <b>Product</b>                      | Dispose of through a licensed waste operator according to local/national regulations. Do not discharge to drains. |
| <b>Hazardous properties (waste)</b> | HP4, HP6, HP13, HP14                                                                                              |
| <b>Contaminated packaging</b>       | Empty completely; do not reuse; dispose of as unused product.                                                     |

## SECTION 14: Transport information

|                            | ADR / RID                                                             | IMDG                                                                  | IATA                                                                  |
|----------------------------|-----------------------------------------------------------------------|-----------------------------------------------------------------------|-----------------------------------------------------------------------|
| 14.1 UN number             | UN 3082                                                               | UN 3082                                                               | UN 3082                                                               |
| 14.2 Proper shipping name  | ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (BENZYL BENZOATE) | ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (BENZYL BENZOATE) | ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (BENZYL BENZOATE) |
| 14.3 Class                 | 9                                                                     | 9                                                                     | 9                                                                     |
| 14.4 Packing group         | III                                                                   | III                                                                   | III                                                                   |
| 14.5 Environmental hazards | Yes                                                                   | Yes — marine pollutant                                                | Yes                                                                   |

14.6 Special precautions: ADR tunnel code (-); limited quantity 5 L/5 kg; packages ≤ 5 L/5 kg are exempt from the environmentally hazardous substance provisions (ADR SP 375, IMDG 2.10.2.7). 14.7 Bulk (IMO): not applicable.

## SECTION 15: Regulatory information

|                                      |                                                                                                                                                                               |
|--------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>EU regulations</b>                | Regulation (EC) No 1272/2008 (CLP); Regulation (EC) No 1907/2006 (REACH); Regulation (EU) 2020/878.                                                                           |
| <b>SVHC / Annex XIV / Annex XVII</b> | No SVHC ≥ 0.1%; no Annex XIV substances.                                                                                                                                      |
| <b>Seveso III</b>                    | E1 — Hazardous to the aquatic environment, Acute 1 / Chronic 1.                                                                                                               |
| <b>PCN / UFI</b>                     | UFI M3QW-14G3-M00U-YX6D (manufacturer's notification).                                                                                                                        |
| <b>IFRA (50th)</b>                   | Candles (Cat. 12): no restriction (100%). Reed diffusers (Cat. 10A): max 2.51%. Room sprays (Cat. 10B): max 15.87%. Fine fragrance (Cat. 4): max 6.34%. See IFRA certificate. |

## SECTION 16: Other information

|                      |                                                                                                                                                                                                                                                                                                                                                                                       |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Revision</b>      | Version 1.0 — Eco Candle Project edition, 28/10/2026. Based on the manufacturer's SDS for the pure fragrance (version 1 of 03/05/2023, issued 03/05/2023), allergen declaration and IFRA 50th Amendment certificate (05/05/2023). The manufacturer declares component concentrations as ranges; the classification was calculated conservatively using the upper limit of each range. |
| <b>Abbreviations</b> | ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; SVHC = Substance of Very High Concern.                                                                                                                                                                                                          |

### Full text of H-statements (Sections 2 and 3):

**H225** Highly flammable liquid and vapour. **H226** Flammable liquid and vapour. **H302** Harmful if swallowed. **H304** May be fatal if swallowed and enters airways. **H315** Causes skin irritation. **H317** May cause an allergic skin reaction. **H318** Causes serious eye damage. **H319** Causes serious eye irritation. **H332** Harmful if inhaled. **H373** May cause damage to organs through prolonged or repeated exposure. **H400** Very toxic to aquatic life. **H411** Toxic to aquatic life with long lasting effects. **H412** Harmful to aquatic life with long lasting effects.

This information is based on our current knowledge and on the manufacturer's data and describes the product for health, safety and environmental purposes only. Users must ensure suitability for their own application.
