SECTION 16: Other information

Revision	Version 1.1 — Eco Candle Project edition, 04/11/2026. Based on the manufacturer's SDS for the pure fragrance (version 3 of 21/09/2023, issued 21/09/2023), allergen declaration and IFRA 51st Amendment certificate (05/09/2023). The manufacturer declares component concentrations as ranges. The exact values from the manufacturer's allergen declaration (20/04/2023) were used for coumarin (0.5%), eugenol (0.199%), d-limonene (0.353%) and cinnamal (0.069%), and the upper limit of the range otherwise (conservative); with these values the calculation reproduces the manufacturer's classification of the pure fragrance (H315, H317, H319, H411). Eye Irrit. 2 results from camphor (Eye Dam. 1, ≤ 2.49%, counted ×10) together with diphenyl ether and menthol; camphor stays below the 3% limit for Eye Dam. 1. The manufacturer has not issued SDSs for diluted preparations — the classifications of the 5%, 10% and 23% preparations were calculated by Eco Candle Project with the CLP calculation method. Because the IFRA Category 10A limit is 23.35%, the diffuser preparation was calculated at 23% in Augeo Clean Multi instead of 25%. UFI M4WT-9MVD-JU1A-W853 as confirmed by the manufacturer (22/10/2026). Changes from version 1.0 (22/10/2026): the generic cut-off values of Regulation (EC) No 1272/2008, Annex I, Table 1.1 are now applied in the summation method for aquatic hazards (ingredients below 1 % — or 0.1 % ÷ M for Aquatic Acute 1 / Chronic 1 — are not taken into account). 5% preparation: H412 → not classified. Composition, other hazard classes and IFRA limits unchanged.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; OTNE = tetramethyl acetyloctahydronaphthalenes; SVHC = Substance of Very High Concern.
