SECTION 16: Other information

Revision	Version 1.0 — Eco Candle Project edition, 24/10/2026. Based on the manufacturer's SDS for the pure fragrance (version 15.0 of 18/06/2026, issued 19/06/2026), allergen declaration and IFRA 51st Amendment certificate (19/06/2026). The manufacturer declares component concentrations as ranges. Exact values from the manufacturer's allergen declaration were used where available (benzyl salicylate, citronellol, hexyl cinnamal, acetyl cedrene, cinnamyl alcohol, linalyl acetate, linalool, alpha-isomethyl ionone, geranyl acetate, eugenol, isoeugenol, cinnamal) and the upper limit of the range otherwise (conservative); with these values the calculation reproduces the manufacturer's classification of the pure fragrance (H315, H317, H319, H361, H411). The manufacturer has not issued SDSs for diluted preparations — the classifications of the diluted preparations were calculated by Eco Candle Project with the CLP calculation method.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; SVHC = Substance of Very High Concern.
