Emergency number	CIAV — Poison Information Centre (INEM): +351 800 250 250 (24 h)

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Skin irritation	Skin Irrit. 2 — H315
Serious eye damage	Eye Dam. 1 — H318
Skin sensitisation	Skin Sens. 1 — H317
Aquatic hazard, chronic	Aquatic Chronic 2 — H411

Classification calculated by Eco Candle Project with the CLP calculation method (Regulation (EC) No 1272/2008), using the upper limit of each concentration range declared by the manufacturer, which coincides with the exact values of the manufacturer's allergen declaration and IFRA certificate (e.g. hexyl cinnamal 6.84%, amyl cinnamal 5.8%, linalool 5.7%, geraniol 3.857%); for 2,2-dimethyl-3-(3-tolyl)propan-1-ol (majantol) the exact value of the IFRA certificate (0.303%) was used. The calculation reproduces the manufacturer's classification of the pure fragrance (H315, H317, H318, H411); Eye Dam. 1 — H318 results from geraniol (Eye Dam. 1) above 3%. Helional (Repr. 2, ≤ 1.33%) is below the 3% generic concentration limit. The 5% preparation is not classified, as in the manufacturer's SDS for that dilution. For the 10% preparation the upper limits of the ranges give Aquatic Chronic 3 — H412 (100 × Chronic 1 + 10 × Chronic 2 + Chronic 3 ≈ 36%), whereas the manufacturer's 10% SDS in dipropylene glycol is not classified — the manufacturer knows the exact formula; Eco Candle Project keeps the more protective result. Because the IFRA Category 10A limit is 11.27%, the diffuser preparation was calculated at 11% in Augeo Clean Multi instead of 25%; Augeo Clean Multi adds Eye Irrit. 2 — H319.
