SECTION 16: Other information

Revision	Version 1.0 — Eco Candle Project edition, 28/10/2026. Based on the manufacturer's SDS for the pure fragrance (version 1 of 07/08/2024, issued 11/02/2025), allergen declaration and IFRA 51st Amendment certificate (11/02/2025). The manufacturer declares component concentrations as ranges. Concentrations were established by Eco Candle Project as follows: exact values where the manufacturer's allergen declarations for the 5%, 10% and 25% dilutions give the same value for the pure fragrance (acetyl cedrene 8.8%, patchouli oil 6.9%, citronellol 1.49%, geranyl acetate 0.6%, Atlas cedarwood oil 0.5%, geranium oil 0.5%, pinene 0.21%, orange oil 0.1%); the remaining components at the upper limit of their range, further limited by the ranges stated in the manufacturer's dilution SDSs. The calculation reproduces the manufacturer's classification of the pure fragrance (H317, H411) and of the 5%, 10% and 25% preparations (H412; H412; H317, H411). Section 3 shows these values as ranges. Classification of the 10% preparation calculated by Eco Candle Project.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; SVHC = Substance of Very High Concern.
