SECTION 4: First aid measures

Eye contact	Rinse cautiously with water for at least 15 minutes, holding eyelids open. Remove contact lenses if easy to do. If eye irritation persists, seek medical advice.
Skin contact	Remove contaminated clothing. Wash skin with plenty of soap and water. If skin irritation or rash occurs, seek medical advice. Molten wax: cool immediately with cold water; do not remove adhering wax; seek medical attention for burns.
Inhalation	Move the person to fresh air and keep at rest. If symptoms persist, seek medical advice.
Ingestion	Rinse mouth. Do NOT induce vomiting. Contact the Poison Centre (CIAV 800 250 250) or a doctor.

**SECTION 7: Handling and storage**

7.1 Safe handling	Melt the wax with controlled heating and good ventilation. Add the fragrance at a moderate temperature (typically 75–85 °C, or as per the wax data sheet) and below the fragrance flash point (above 93 °C). Do not leave melting wax unattended. Wash hands after use.
7.2 Storage	Keep container tightly closed in a cool, dry, well-ventilated place (10–25 °C), protected from light, heat and ignition sources. Keep out of reach of children.
7.3 Specific end uses	See Section 1.2 and the IFRA certificate.

SECTION 8: Exposure controls/personal protection

Contaminated packaging	Empty completely; do not reuse; dispose of as unused product.

SECTION 14: Transport information

Not classified as dangerous goods (ADR/RID/IMDG/IATA) at 10% — Aquatic Chronic 3 is not regulated for transport. The pure fragrance (100%) is UN 3082, Class 9, PG III. Finished candles are articles and are not regulated.

SECTION 15: Regulatory information

EU regulations	Regulation (EC) No 1272/2008 (CLP); Regulation (EC) No 1907/2006 (REACH); Regulation (EU) 2020/878.
SVHC / Annex XIV / Annex XVII	No SVHC $\geq 0.1\%$; no Annex XIV substances.
Drug precursors	Contains piperonal (CAS 120-57-0, 0.04%), a Category 1 scheduled substance under Regulation (EC) No 273/2004 (Annex I). IFRA (51st)	Candles (Cat. 12): no restriction — 10% complies.

SECTION 16: Other information

Revision	Version 1.0 — Eco Candle Project edition, 28/10/2026. Based on the manufacturer's SDS for the pure fragrance (version 2.0 of 02/04/2024, issued 02/04/2024), allergen declaration and IFRA 51st Amendment certificate (02/04/2024). The manufacturer declares component concentrations as ranges; the classification was calculated conservatively using the upper limit of each range (for benzyl benzoate, coumarin, α -methylcinnamaldehyde, anisaldehyde and OTNE this coincides with the exact values of the manufacturer's IFRA certificate), which reproduces the manufacturer's classification of the pure fragrance (H315, H317, H319, H411). The allergen declaration gives linalool at 9.81% in total (including linalool naturally present in lavandin oil and other natural materials), above the 8.62% declared for added linalool in section 3. The 10% and 25% preparations are consistent with the manufacturer's SDSs for those dilutions (H412; H317, H412). For the 5% preparation the manufacturer's SDS indicates no classification (EUH208 only); Eco Candle Project classifies it Aquatic Chronic 3 — H412, because with the exact concentrations of the manufacturer's IFRA certificate (OTNE 3.25%, α -methylcinnamaldehyde 1.40%, Aquatic Chronic 1) the CLP summation $100 \times \text{Chronic 1} + 10 \times \text{Chronic 2} + \text{Chronic 3}$ already reaches 25% at 5% dilution even with the lower limit of every other range ($\approx 25.6\%$; $\approx 26.8\%$ with upper limits). Eco Candle Project retains the more protective classification. The IFRA Category 10A limit (4.22%) does not allow a 25% reed-diffuser preparation; the diffuser SDS is therefore issued for 4% in Augeo Clean Multi. Classification of the 10% preparation calculated by Eco Candle Project.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; OTNE = tetramethyl acetyloctahydronaphthalenes; HHCB = hexamethylindanopyran; SVHC = Substance of Very High Concern.
